Project Description

The project proposes to replace the Shoemaker Bridge (West Shoreline Drive) in the City of Long Beach, California. The Shoemaker Bridge Replacement Project (proposed project) is an Early Action Project of the Interstate 710 (I-710) Corridor Improvement Project and is located at the southern end of I-710 in the City of Long Beach and is bisected by the Los Angeles River.

Environmental Review Process

The City of Long Beach, is conducting preliminary alignment and environmental studies for the Shoemaker Bridge Replacement Project (proposed project).

The process includes studying environmental impacts for the proposed project and the review of three alternatives. Proposed build alternatives will improve existing traffic safety and operations.

A public scoping meeting will take place on April 13, 2016 at the Cesar Chavez Community Center Social Hall, to gather community input and provide critical project information. Public participation throughout the process is essential.

Tentative Schedule
